-

PROJECTS:

I have completed a few projects like Food Ordering System, E-commerce website and Tours & Travel website some in all projects, mostly frontend,s For the sake of HTML and CSS I have used it or for the backend I have used PHP for the sake of it or I have also got some errors but by solving them all the projects have been completed.

- 1) **Title:** Food Ordering System

Description: In this project user can see the menu of restaurant and place the order of menu and more features like add to cart, give ratings, also see menu in category wise like desert, veg and nonveg.

Language used: Html, Css, Javascript, php, Mysql, etc.

- 2) **Title:** Ecommerce Website

Description: The user can purchase the items using payment method and also see the all details and review of the item.

Language used: Html, Css, Javascript, php, Mysql, etc.

- 3) **Title:** Tours and travels

Description: The user can see details about the Tous packages and also book the tickets of the travels bus and check the bookings.

Language used: Html, Css, Javascript, php, Mysql, etc.

EXPERIENCE:

Make some freelancing projects for client like Photography website, Blog website and Pharmacy website using the web development skills.

HOBBIES AND ACTIVITY:

- Reading and practicing the concept of Backend development.
- Experiencing new cultures and gaining inspiration from different environments.
- Working with other designers and developers or creatives on collaborative projects.
