CAREER OBJECTIVE

I'm a CS graduate passionate about tech and creativity, skilled in basic coding (Python, Java, PL/SQL, MongoDB) and designing with Figma & Framer. I also explore AI and no-code tools.

Experienced in collaboration using Discord, Jira, Slack, Asana, Notion, and Trello, I've freelanced designing websites, building Discord bots, and managing e-mail campaigns. Outside work, I enjoy F1, piano, and time with loved ones.

INTERNSHIPS

Thinkbar, *UI/UX Designer* 🔗

2025 January – 2025 April | Mumbai, India
- Designed mobile UI/UX and prototypes for Baepool, a dating, networking, and community app, ensuring smooth user flows and visual appeal.
- Crafted website UI for beauty, paint, and education clients, along with social media creatives and Meta ad visuals, ensuring pixel-perfect design quality.

Soulace, *UI/UX Designer*

2024 October – 2024 December | Bengaluru, India
- Designed intuitive mobile app interfaces for Soulace, meeting deadlines and following to modern UX standards with detailed UX reports.
- Collaborated with senior designers and developers to ensure seamless, user-friendly design implementation.

PROJECTS

Newslettrai 🔗

2024 December – 2025 January
- Designed and built the NewslettrAI landing page from scratch, handled UI/UX, content, and design testing for a clean, conversion-focused experience.

Timezone Bot 🔗

2024 November – 2024 November
- Created a Python discord bot for real-time updates across different countries, ensuring accurate time & automated updates with voice channels.

Reelerai 🔗

2024 March – 2024 April
- I built the Reelerai website using Framer, focusing on a visually appealing, user-friendly interface with responsive design & interactive elements.

Twilio SMS Automation 🔗

2023 September – 2023 September
- Revamped lead generation with Twilio & Google Sheets, optimizing workflow. Enhanced SMS outreach with Apollo for real-time monitoring & setup.

CHALLENGES

Design Challenge, *Pushing Creativity and Time Management to the Limit* 🔗

2025 January – 2025 February
- A daily design challenge to improve creativity, speed, and adaptability by creating diverse projects, from web pages to app interfaces, under time limits.

SKILLS

- Programming Languages
- UI/UX Design
- Leadership/ Project Management
- No-Code Tools
- Problem-solving/ Quick learner
- Email Marketing
- Communication/ Collaboration
- DBMS/ RDBMS/ NODBMS

TECHNOLOGIES

- Python, Java
- Figma, Framer
- MySQL, PL/SQL, MongoDB
- Apollo/ Instantly
- Notion/ Trello/ Jira/ Asana/ Discord
